

HAMMER

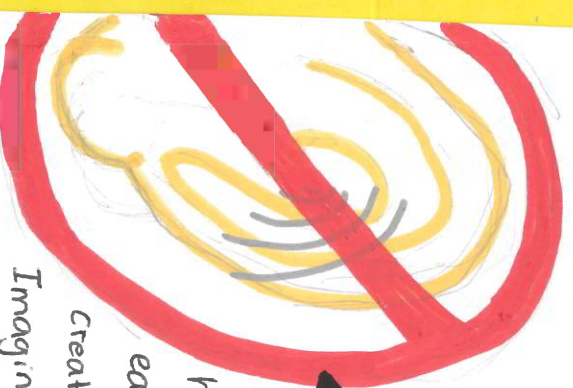

Hazard assessment & control guide

Best Practice

Consequence Analysis

Deaf

Repeated use of a loud hammer with no earmuffs. Overtime can create loss of hearing. Imagine if you could no longer hear WEAR EARMUFFS!!!

HOW TO AVOID?

Wear ear protection and all the correct safety equipment.

Repeated use of a hammer with no safety equipment for your ears like earmuffs has a impact level of 8 but a risk level of 2

Code: Red = permanently deaf, Pink = gauging out eyeball, blue = cutting fingers, yellow = banging or fingers

IMPACT VS LIKELIHOOD OF GOING DEAF
